

The Basics of Programming

C++

Social Competences Self-diagnosis Test

Below you will find simple test which help you to decide if programming could be your professional choice. Please answer the questions. Be frank with yourself.

For each answer you will get:

a – 3 points,

b – 2 points,

c – 1 point,

d – 0 points.

- 1. How often do you think about starting to program professionally?**
 - a. Often
 - b. Sometimes
 - c. Rarely
 - d. Never
- 2. How many hours a day do you spend in front of a computer?**
 - a. More than 10
 - b. From 7 to 10
 - c. From 3 to 7
 - d. Less than 3
- 3. What percentage of time is spent in front of a computer on programming or learning to program?**
 - a. Over 80%
 - b. From 50% to 80%
 - c. From 20% to 50%
 - d. Less than 20%
- 4. Do you like working in a big team?**
 - a. I like very much
 - b. I am fine with that
 - c. I prefer small teams
 - d. I do not like teamwork
- 5. How many hours a day can you allocate for learning new technologies?**
 - a. Over 6
 - b. From 4 to 6
 - c. From 2 to 4
 - d. Below 2

6. **How do you assess your attitude to programming?**
 - a. It is my passion
 - b. Interesting topic
 - c. Little fascinating
 - d. I do not like programming
7. **Do you place comments in programs while writing them?**
 - a. Yes, I comment on everything
 - b. I only comment on difficult fragments to me
 - c. I comment sporadically
 - d. What for to write comments, after all I know what it is all about.
8. **When do you check if the written program is correct:**
 - a. After writing a few, over a dozen code lines
 - b. I check after writing several hundred code lines
 - c. I check sporadically
 - d. I do not check, my code is perfect
9. **Do you like analysing programs made by others:**
 - a. Yes, I do
 - b. I can do that
 - c. No, I don't
 - d. I never do that
10. **How do you assess your attitude to learning new things:**
 - a. It is super
 - b. I sometimes like it
 - c. If I really have to, then I will learn something
 - d. I used to learn when they made me do that

Interpretation of test results:

- 21 – 30 points You were born to program, you are not afraid of new challenges, you are fascinated

You learning new things.

- 11 – 20 points You approach programming in a very rational way, you can entrust the implementation of complex tasks.
- 0 - 10 points You're good at what you do, but programming doesn't have to be yours the future. You can become a tester, UI designer, or take a job something else in a complex software development process.
